

- CONTEST - VITAFOODS 2023

May 9th / 11th 2023

VITAFOODS J164

DATA SCIENCE CONTEST

Win a **10-day** data scientist consultancy

or a **20% discount** for all projects submitted

CONTEST DETAILS AND TERMS

For more than 20 years, Biofortis has been supporting you in the conduct of your clinical trials in nutrition and in your laboratory analyses including the most advanced approaches to microbiome investigations.

Faced with the growing demand from our clients for data analysis and integration, our team of experts, who until now supported our activities internally, has stepped out of the shadows and developed its own external activity with the creation of its own Biometrics & Data Science Business Unit, the third major pillar of Biofortis's activities today.

At the service of your data, our experts are here to help you make the most of the gold mine you are potentially sitting on, by providing:

- . A specific area of expertise: health, nutrition, biology, and microbiome data
- . A multidisciplinary team located on a single site: Data Management, Biostatistics, Bioinformatics, Data Science, Scientific & Medical Writing
- . A collaborative, hand-in-hand, sequential approach with stop-and-go procedures to limit the risk of wasting your time and money
- . A method of working: project mode or consulting
- . Clear objectives of return on investment for you: Understand, Accelerate, Rescue, Derisk and Value

As part of Vitafoods Europe, Biofortis wants to promote its new Biometrics & Data Science Business Unit by organising a contest aka the «Biofortis Data Science Contest».

General terms:

Submissions will open two weeks prior to Vitafoods 2023 (May 9th/11th) and will close on May 11th. The winning project will be announced after the event.

What is there to win?

For the winner: 10 days of free support from our team of Data Science experts to help you respond to challenging questions and make the most of your data.

For all participants except the winner: a 20% discount on the quotation of the submitted project until September 1st.

How to participate in this contest?

Nothing could be easier, just answer our questionnaire: [link](#) or visit our stand at Vitafoods (booth J164) before the end of Vitafoods Europe.

What are the conditions to participate?

Just two specific requests from us:

1 / You already have precise scientific questions, your data is already available and cleaned!

2 / You would be willing to support us at the end of your project by sharing your feedback, your case, and some sample results.

How will the winning project be chosen?

By a random draw. You will be personally informed at the end of Vitafoods Europe.
